Science Marches On!

More discoveries and inventions were made in the 19th century than at any other time in the history of the world. It was these wonderful inventions that propelled us into the modern age of cell phones and cyber cafes and fast transport and made travel to outer space and the depths of the oceans, possible.

This easy-to-read, beautifully illustrated and coloured volume, drawing from Tinkle's storehouse of knowledge and information chronicles the humble beginnings of some of the discoveries and inventions that helped to change our lives for the better.

Available on newsstands.
